Predicting Employee Salary with Multiple Linear Regression

AIM:

To develop a model using simple linear regression to predict employee salaries based on various factors such as experience, education level, job role, etc., with the aim of providing.

Predicting Employee Salary with Multiple Linear Regression
Objective
Our app aims to predict employee salaries using multiple linear regression. We focus on factors such as experience, education level, job role, and more to provide accurate salary estimates for job candidates and help optimize compensation strategies for companies.
Desired Outcomes
Accurately predict the salary for a job candidate based on their qualifications and experience.
Identify factors that significantly impact employee salaries.
Provide valuable insights for HR departments and hiring managers.
